Jetzt bewerben

Over 600 employees worldwide are responsible for the success of the innovative and family-owned Schill + Seilacher Group, whose vigorous research and development ensures a continued and dynamic growth.

Job description:

- You are responsible for the professional chemical and technical customer service throughout the rubber industry in Europe and worldwide
- You are our expert who carries a high degree of our customers trust and who represents our company at all levels
- You manage your customer visits independently and also take an active role on our national and international exhibitions

Your profile:

- Chemical engineer or comparable graduate level qualification

- Prior sales experience is desirable
- Good technical and chemical know-how, preferably within a rubber article or tire manufacturer rubber chemicals, alternatively technical experience within a rubber article or tire manufacturer.
- Customer focussed attitude with confidence to work under own initiative and also comfortable as part of a multi departmental team within a project framework
- Excellent English, and fluently German (Level C2); further languages are advantageous
- Competence with MS Office applications are self-evident
- You like to travel regularly

We offer:

- A dynamic working environment which encourages discrete thinking and working
- Professional job training, especially with regard to our chemical specialities
- Working and travelling in an international surrounding for a continuously growing company
- Flat company structures ensure decisions without delay and a constructive atmosphere
- We set a high value on a long term and reliable cooperation and offer a competitive package under attractive conditions

You are open-minded and willing to work in a team? Then we should meet.
